RE: **Final Report**

Dear [REDACTED]

PCR 2/83 has been confirmed today as being positive for SVD virus following an ELISA performed on second passage, RS cell culture supernatant fluid.

To summarise: both samples received on 19 December (POR 1/2003 and POR 2/83) are positive for SVD viral genome (by RT-PCR on original suspension) and positive for SVD virus (by ELISA on second passage, RS cell culture supernatant fluid).

Yours sincerely

[REDACTED]
