20th October 2005

NVL-NARC, Park Road Islamabad Pakistan

Dear

Vaccine matching results for Asia 1 FMD virus samples received from Pakistan on 3rd November 2003 and 17th December 2004 respectively.

The following r_1 values were recently obtained by neutralisation test at the FAO World Reference Laboratory for FMD.

Yours sincerely

CC

	r ₁ Values by neutralisation test against vaccine strains below	
WRL Ref Number	As Ind 8/79	As Shamir
PAK 67/03	0.16	0.55
PAK 76/03	0.11	0.48
PAK 01/04	0.13	0.74
PAK 02/04	0.12	0.39

In the case of neutralisation, one-way comparative values ("r₁" values) greater than 0.3 are normally taken to indicate that the field isolate is sufficiently similar to the vaccine strain that use of the vaccine is likely to confer protection against challenge with the field isolate (Rweyemamu, 1984).
