

WRL Ref Number	r ₁ Values by neutralisation test against vaccine strains below	
	O Ind R2/75	O Manisa
O Som 1/2007	>1.0	0.64

In the case of neutralisation:

$r_1 = \geq 0.3$. Suggests that there is a close relationship between field isolate and vaccine strain. A potent vaccine containing the vaccine strain is likely to confer protection.

$r_1 = < 0.3$. Suggests that the field isolate is so different from the vaccine strain that the vaccine is unlikely to protect.

N.B.
