## FAX TRANSMISSION

**TO:** The Director  
Regional Animal Health Center

**FROM:** [REDACTED]

**DATE:** 19.10.2005

**FAX NO:** [REDACTED]

**PAGES:** 1

**RE:** Vaccine matching results

Dear Sir

Vaccine matching results for O FMD virus isolate received on 21st March 2005.

The following  $r_1$  value was recently obtained by neutralisation test at the FAO World Reference Laboratory for FMD.

<b><math>r_1</math> Values by neutralisation test against vaccine strain below</b>	
<b>Ref. No</b>	<b>O Manisa</b>
Vit 3/05	0.59

In the case of neutralisation, one-way comparative values (" $r_1$ " values) greater than 0.3 are normally taken to indicate that the field isolate is sufficiently similar to the vaccine strain that use of the vaccine is likely to confer protection against challenge with the field isolate (Rweyemamu, 1984).

Yours sincerely

[REDACTED]
